MIDWIFE LED AESTHETICS CLINIC IN LEAMINGTON SPA

Authentically You Aesthetics Price List

Midwife led Aesthetics Clinic in Leamington Spa.

*50% Deposit on booking required for all treatments. The clinic operates a 48-hour cancellation policy.

** Please note that all prices are subject to change after consultation dependant on individual requirements.

Consultation

£30 consultation fee which is redeemable against any aesthetic treatment we offer within a three-month period. A consultation offers a foundation for understanding a client's desires, expectations, and medical history, but also allows both the practitioner and patient to establish full clarity and alignment on treatment goals – ensuring safety, satisfaction and, crucially, establishing trust!

(You may choose to book without a consultation).

Anti-Wrinkle Treatments using Azzalure injectable Botulinum Toxin Type A.

Botulinum toxin is administered using a very fine needle directly into specific facial muscles. It works by temporarily blocking the nerve signals to these muscles, reducing their activity. This softening of muscle movement can improve the appearance of lines formed by facial expressions.

It is important to understand that botulinum toxin can only treat dynamic lines — the lines that appear when you move your facial muscles, such as frowning or smiling. Lines that remain visible when the face is at rest, known as static lines, typically do not improve with anti-wrinkle injections.

Skin Boosters

Skin boosters are injectable skincare treatments that'll improve your skin's texture and hydration from within. They use hyaluronic acid formulations delivered through precise microdroplet injections into your skin's superficial layers.

While dermal fillers are designed to add volume, skin boosters work to improve your skin's overall quality, boosting elasticity and enhancing radiance. You'll see gradual results developing over several weeks, lasting up to six months.

Profhilo

A premium highly concentrated, anti-aging skin booster. Treats skin laxity and dermal atrophy. It works in the same facial areas traditionally treated by dermal fillers.

For optimal results, it is recommended to have 2 Treatments, 4-6 weeks apart, then a maintenance treatment every 4 to 6 months.

£500

Seventy Hyal 2000

The Next Generation Skin Booster developed with hydrating hyaluronic acid (HA) that stimulates new collagen and elastin production.

Seventy Hyal 2000 skin booster produces glowing, healthy skin.

For optimal results it is recommended that you have 2 to 3 treatments spaced 4 weeks apart.

Most clients begin to see noticeable improvement in skin texture, plumpness, and luminosity after the second session, with full results developing shortly after the third.

Hyaaron

The Hyaaron Skin Booster is an injectable treatment designed to improve skin hydration, elasticity, and overall appearance. It uses sodium hyaluronate, a derivative of hyaluronic acid, as its active ingredient. Hyaluronic acid is well-known for its ability to retain moisture and promote skin rejuvenation.

Hyaaron contains 25 mg/mL of sodium hyaluronate, a powerful derivative of hyaluronic acid, designed to deeply hydrate and rejuvenate the skin.

For individuals with uneven skin tone or fine wrinkles.

As a preventive treatment to maintain youthful and healthy skin.

For optimal results a course of 4 treatments is recommended with 2 weeks between each treatment. A top up after 6 months is then recommended.

Polynucleotides

Polynucleotides, are often regarded as the unsung heroes of the molecular world, they are sequences of nucleotides – the vital building blocks of our DNA and RNA. Their connection to our genetic composition ensures a unique and potent interaction with skin cells, unlike anything experienced before in aesthetic treatments.

Plenhyage XL Medium

A high concentration polynucleotide injectable designed for advanced skin restoration and rejuvenation. A medium dosage is generally used to treat skin issues that are not severe. It repairs, revitalises, and hydrates the skin, addressing sun damage, and photoaging while promoting cell turnover and elasticity.

For optimal results, three sessions spaced 2-3 weeks apart are advisable. A top up treatment is required every 4-6 months.

£480

3 Treatments

£650

Plenhyage XL Strong

A high concentration polynucleotide injectable designed for advanced skin restoration and rejuvenation. This larger dose is recommended for more severe skin concerns like deep wrinkles and creases. It is also the preferred dosage for treating acne scars.

For optimal results, three sessions spaced 2-3 weeks apart are advisable. A top up treatment is required every 4-6 months.

Nucleofil Strong

Nucleofil Strong is a next-generation injectable skin booster designed for bio-stimulation, skin repair, and anti-ageing rejuvenation. With its 2.5% polynucleotide-based formula, it provides deep hydration, strengthens elasticity, and stimulates natural collagen production. Ideal for tired, sagging, or dehydrated skin, this polynucleotide skin booster offers medical professionals a non-surgical anti-ageing solution with long-lasting results.

For optimal results a course of 2-4 treatments should be completed, with each treatment taking place every 3 weeks. It is recommended to have another treatment to maintain the effects of the injectable every four to six months.

Dermal Fillers

Dermal filler injections are a type of nonsurgical cosmetic procedure. Dermal fillers are injected strategically under the skin to enhance facial features or gain a more youthful appearance. This elective treatment usually takes less than half an hour, and recovery time is minimal. Results are seen right away and last months to years depending on the type of filler and the location.

Lip Filler

Using a tenting technique and Revolax filler, I will make vertical injections to create the required volume and external rotation on the lips. It is effective for achieving a fuller appearance whilst maintaining a natural contour.

Dermaplaning

Dermaplaning is a minimally invasive procedure that shaves away the top layers of your skin. It can help reduce the appearance of fine lines, acne scars or pitted skin. Dermaplaning also removes vellus hair creating a smoother texture skin for make-up application.

Treatment

£45

Dr Pen Microneedling

Microneedling works by creating controlled micro-injuries in the skin using fine, sterile needles. This process stimulates the body's natural healing response, encouraging the production of new collagen and elastin fibres.

The result is visibly smoother, tighter, and healthier-looking skin. Microneedling can be used to treat common skin concerns such as fine lines, acne scarring, sun damage, and enlarged pores. It's a safe, effective, and non-surgical option for achieving natural rejuvenation.

You may choose to use a numbing cream before the treatment; you are welcome to arrive at clinic 30 minutes before your scheduled appointment for this to be applied.

Once you are feeling comfortable your face will be double cleansed and a serum chosen according to your specific skin concerns. The depth and speed of the pen will be adjusted to meet your individual needs.

For optimal results a course of 3 sessions should be delivered spaced 4-6 weeks apart. Maintenance sessions are recommended every 4-6 months to keep the collagen boosted.

1 Session with serum targeting specific skin concern

£150

Course of three sessions with serum targeting specific skin concern(s)

Vitamin Injections

Vitamin B12 can boost your energy levels, help you lose weight, improves brain power, enhances mood, aids sleep, alleviates anxiety and gives an overall sense of well-being.

B12 shots are administered intramuscularly and given once every 1-3 months for best results.

By providing a highly reliable and assured dose of B12 by injection we can help to safeguard and maintain long term health and promote wellness & vitality.

Vitamin B12

£35

Vitamin D is essential for healthy immune function and strengthens bones and teeth, as it plays a crucial role in calcium absorption and utilization. Unfortunately, many people are deficient in vitamin D, which can lead to a variety of health problems. In addition to its bone and immune-supporting properties, vitamin D has also been shown to improve mood, support healthy brain function, and reduce inflammation.

Vitamin D

£35

Fat Dissolving Injections

Aqualyx is a non-surgical injectable treatment that permanently dissolves localised fat cells. It contains deoxycholic acid which causes fat cells to be naturally eliminated through the lymphatic system over several weeks. The treatment allows for precise targeting of stubborn fat deposits that are resistant to exercise, such as under the chin, jawline, abdomen, flank, upper arms, knees and elbows. Results usually begin to appear 6-8 weeks after treatment. 1-3 treatments are required for tiny areas like the chin, and 2-6 sessions for bigger areas like the thighs.

Repeat treatments should be scheduled six to eight weeks apart, and clients should start seeing changes three to six weeks after the initial treatment.

1 Small Treatment Area

Single treatment - £125

Three treatments package - £300

1 Large Treatment Area

Single Treatment - £200

Three treatment package - £540

Four treatment package - £650

Five treatment package - £750

Six treatment package - £850

*Cancellation policy: 48 hours' notice to rearrange appointment at no extra charge. Less than 48 hours will be loss of deposit. (As Botulinum toxin is a prescription only medication this cost cannot be refunded once booked).

**Prices are subject to change if after consultation the treatment must be adapted due to customers personal requirements. Men tend to have stronger facial muscles and may require more anti-wrinkle treatment for optimal results. This will be fully discussed at consultation and a price given then.

Fully insured and training accredited.
